Summary

Senior Full Stack Engineer with 6+ years of experience building and shipping production software across web, mobile, and backend systems. Product-minded engineer who takes features from problem definition and technical design through implementation, rollout, and production reliability. Experienced with TypeScript, React/Next.js, Node.js, Rust, Golang, relational databases, search, and distributed systems in fast-moving SaaS and startup environments. Uses AI coding tools such as Claude and Cursor to accelerate codebase exploration, planning, implementation, and review, with engineering judgment and testing to validate results.

Work Experience

Draftea | Mexico City, Mexico (Remote)

Software Engineer III
Mar 2026 - 2026-10-1

Owned architectural design and foundational development for an internal Backoffice platform supporting sportsbook operations, defining reusable patterns and core capabilities for future evolution.

- Defined the platform foundation and architectural approach for an internal Backoffice, working across authentication, authorization, and access-control requirements.
- Designed reusable integration patterns and service boundaries to support maintainability, secure access, and future operational workflows.
- Draftea acquired Pitaco in March/2026.
