Senior Software Engineer focused on backend engineering, distributed systems, platform architecture, and AI-assisted software development. Open to remote opportunities.

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building backend services, distributed systems, web and mobile products. Strong background in TypeScript, JavaScript, Node.js, Rust, gRPC, REST APIs, microservices, relational and non-relational databases, and asynchronous processing. Experienced in technical design, cross-platform architecture, automated testing, observability, and production delivery for products serving more than 2 million customers. Combines hands-on engineering with technical ownership, product collaboration, and AI-assisted development using Claude and Cursor to support implementation, investigation, and code quality.

EXPERIENCE

Draftea
Mar 2026 – Oct 2026

Software Engineer III — *México (Remoto)*

- **Internal platform architecture:** Contributed to the architecture and implementation of an internal Backoffice platform supporting sportsbook operations, establishing reusable application patterns for future development.
- **Authentication and authorization:** Worked on authentication, access control, permission management, and reusable foundations for internal applications.
- **Backend and application integration:** Contributed to technical decisions across application boundaries, API access, and integration points.
- Draftea acquired Pitaco in March/2026.
- **Skills:** TypeScript, JavaScript, Node.js, Go, Vercel, WorkOS.

Pitaco (formerly Rei do Pitaco)
Mar 2024 – Oct 2026

Software Engineer III — *Remote, Brazil*

- **Backend and product engineering:** Delivered end-to-end features across Flutter mobile applications, React/Next.js web applications, and Rust backend services for a Brazilian sportsbook serving more than 2 million customers.
- **Core platform capabilities:** Delivered functionality involving KYC, authentication, access control, and real-time sportsbook experiences across web, mobile, and backend systems.
- **System design and technical decisions:** Wrote and reviewed technical RFCs, shaping cross-platform architecture while balancing product requirements, reliability, maintainability, and delivery speed.
- **Data and production observability:** Worked with PostgreSQL, Redis, Elasticsearch, and TimescaleDB, using Datadog for monitoring and Statsig, Mixpanel, and AppsFlyer for experimentation and product analytics. Also worked with Meta Conversions API integrations.
- **Technical leadership:** Supported junior engineers through code reviews, technical guidance, and knowledge sharing; contributed to web performance and internal operational tools.
- **Skills:** TypeScript, JavaScript, Node.js, Rust, Flutter, React, Next.js, PostgreSQL, Redis, Elasticsearch, TimescaleDB, Datadog, Statsig, Mixpanel, AppsFlyer.

Rei do Pitaco
Jan 2023 – Feb 2024

Software Engineer III — *Remote, Brazil*

- **Product development:** Delivered cross-platform product features, collaborating with UX and product stakeholders on implementation and technical decisions.
- **Onboarding and activation:** Contributed to onboarding and activation improvements across web and mobile applications. An approximately 15% activation increase was recorded in the original resume; validate the metric and attribution before using it in the final application.

Rei do Pitaco
Mar 2022 – Feb 2023

Software Engineer II — *São Paulo, Brazil (Remote)*

- **Web performance and technical SEO:** Improved the technical foundations and performance of the web platform to support organic search visibility and user acquisition.
- **Internal applications:** Built an Angular Universal-based internal tool for the Universo Pitaco content platform.
- **Skills:** JavaScript, TypeScript, Angular Universal, technical SEO, web performance.

SAP SE
Jun 2022 – Dec 2022

Software Developer — *Walldorf, Germany (Remote)*

- **Enterprise applications and integrations:** Contributed to SAP Document and Reporting Compliance (DRC), working on application functionality and external integrations.
- **Automated testing and quality:** Worked on unit and end-to-end tests, technical documentation, and development workflows to support maintainability and reliable delivery.
- **Team collaboration:** Temporarily supported Scrum Master responsibilities.
- **Skills:** TypeScript, JavaScript, Node.js, Jest, Karma, Docker, Kubernetes, Kyma, SAP BTP, SAP HANA, Jenkins, SAP Fiori/UI5.

Nuveo **Jun 2021 – Feb 2022**

Software Engineer *São Paulo, Brazil (Remote)*

- **Backend APIs and microservices:** Developed APIs and microservices for document and image processing automation products.
- **Asynchronous processing and messaging:** Worked with RabbitMQ and asynchronous processing infrastructure to support backend workflows and service integration.
- **Data and persistence:** Worked with relational and non-relational databases in backend applications.
- **Engineering quality:** Contributed to automated tests, technical documentation, and containerized development workflows.
- **Skills:** Python, Go, Node.js, PostgreSQL, MySQL, Redis, DynamoDB, RabbitMQ, Prometheus, Grafana, Docker, Kubernetes, Vue.js, Flask, Django, Nginx.

Xekout **Jan 2020 – May 2021**

Junior Full Stack Engineer *Remote*

- **Backend development and integrations:** Developed and maintained checkout solutions and backend integrations for Shopify and WordPress platforms.
- **Payment processing:** Integrated Mercado Pago, PagSeguro, PicPay, and Juno, supporting payment workflows for Brazilian e-commerce.
- **API and database integration:** Worked across frontend interfaces, backend services, databases, and deployment environments.
- **Skills:** JavaScript, TypeScript, Node.js, AdonisJS, NestJS, Vue.js, PostgreSQL, MySQL, AWS, Heroku, Serverless.

Pitaya (RedeNet soluções) **Jul 2019 – Nov 2019**

Full Stack Developer *Brazil*

- Contributed to the development of a school transportation management system.
- **Skills:** Java, Spring Boot, Maven, PostgreSQL.

Workana **Feb 2017 – Jan 2018**

Freelance Web Developer *Remote*

- Built and maintained landing pages, static websites, and dynamic web applications for clients.
- **Skills:** PHP, HTML, CSS, Vue.js.

EDUCATION

Technology Degree in Systems Analysis and Development — Instituto Federal da Paraíba (IFPB), Cajazeiras **2016 – 2020**

LEADERSHIP AND COMMUNITY

- **Technical mentoring:** Supported junior engineers through technical guidance, code reviews, and knowledge sharing.
- **Speaker:** "Vue: Desenvolvendo Aplicações Web Progressivas" — Loopis Jr., IFPB Cajazeiras, 2019.

SKILLS

- **Human Languages:** Portuguese (native), English (advanced).
- **Languages:** TypeScript, JavaScript, Python, Go, Rust, Dart, SQL, PHP, Java.
- **Backend and APIs:** Node.js, NestJS, AdonisJS, REST APIs, microservices, API integrations, authentication, authorization.
- **Architecture and Distributed Systems:** System design, technical RFCs, distributed systems, event-driven architecture, asynchronous processing, service integration.
- **Databases and Messaging:** PostgreSQL, MySQL, Redis, Elasticsearch, TimescaleDB, DynamoDB, RabbitMQ, Kafka, BigQuery.
- **Observability and Product Analytics:** Datadog, Statsig, Mixpanel, AppsFlyer, Prometheus, Grafana.

- **Cloud and Infrastructure:** AWS, Docker, Kubernetes, Vercel, GitHub Actions, Jenkins, SAP BTP, Kyma, Serverless.
- **Testing and Engineering Practices:** Automated testing, unit testing, end-to-end testing, code reviews, technical documentation, maintainable software design, technical mentoring.
- **Frontend and Mobile:** React, Next.js, Flutter, Vue.js, Angular Universal, HTML, CSS, Tailwind CSS.
- **AI-Assisted Development:** Claude, Cursor, MCP, AI-assisted code exploration, ADR, implementation, debugging, and testing workflows.
- **Engineering Methodologies:** Technical design, specification-driven workflows, cross-functional collaboration, continuous improvement.
